PhD Economics (ongoing)
University of Siena (Italy)

Alan Seemon

MA Financial Economics
Madras School of Economics

What Makes Our Course Different?

Our course focuses on building strong theoretical foundation in the subjects along with training students to solve applied quantitative problems. We also organize alumni interaction events to provide students with opportunities for networking and gaining insights from accomplished alumni hailing from India's premier universities.

Appraisals:

Jayashree

MA Economics, MSE

“For any competitive exam preparation today most important thing one needs is guidance in channeling your efforts in the right direction which in my case was done by Team Economiga. I started my preparation late and still was able to crack the only master's entrance exam I ever wrote. They have been with me throughout my admission process and are still with me.”

Harikrishnan P A

MA Economics, HCU

“If not for the platform and guidance provided by the team at Economiga, I don't think I would've ever cracked the CUET-PG 2023. Especially grateful to Ritik sir for his simple but nuanced take on explaining mathematical economics; and to Nithin sir for delving deeper into the concepts in macroeconomics while maintaining ease of understanding. The base that they helped me build has come really handy even beyond CUET - in learning for PG. All in all, I'm really grateful to all the coordinators and tutors at Economiga for their continued support in my preparation..”

Anjana V

MA Economics,
CESP, SSS, JNU

"I am immensely grateful to Economiga for their invaluable support in my CUET entrance exam preparation. The wealth of resources, including comprehensive past year question papers and insightful webinars, played a pivotal role in understanding the exam pattern and approaching it smartly. Special thanks to Naveen and Nandu for their unwavering guidance and support throughout the preparation journey. Economiga truly distinguishes itself through its unwavering commitment to success. I have been associated with Economiga for the past three years, and I'm happy to have found a platform where I can connect with like-minded individuals to enhance my understanding and knowledge on various pertinent topics in economics."
